

# The Early Childhood Preschool Experience

## Two Year Old Learning Center

Preschool is an important time for Two year old children, since it is a time of physical, cognitive, social, and emotional skills growth that will carry them throughout their early childhood. At Angels Academy, the Two year old curriculum plan is designed to begin introducing early childhood learning fundamentals to your child through a variety of structured classroom activities.

The Two year old program encourages our students to begin to expand their communication and vocabulary skills as they prepare for preschool learning experiences. Our teachers develop daily lesson plans that allow children to become more comfortable with the classroom learning environment. We incorporate group circle time into the day to develop listening and learning skills.

The concepts and skills that we will work on include language arts, phonics, motor skills, numbers, creative development, music, bible study, arts and crafts, and physical activity time. Our dedicated and trained classroom teachers incorporate singing and sensory exploration into daily activities to inspire and support your child's development and exploration.
